hello this is the teasing

If you don't specifically need strict Arial compatibility, Open Sans is generally considered visually superior and much easier to read for long paragraphs and UI elements.

If you don't

If you don't specifically need strict Arial compatibility, Open Sans is generally considered visually superior and much easier to read for long paragraphs and UI elements.

If you don't

If you don't specifically need strict Arial compatibility, *Open Sans is generally considered visually superior* and much easier to read for long paragraphs and UI elements.

```

(defun toggle-maximize-buffer ()
  "Maximize buffer."
  (interactive)
  (save-excursion
